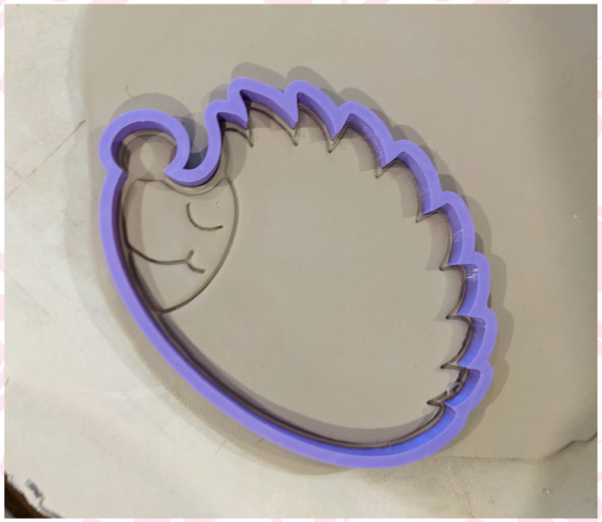
Make a Hedgehog with me...

Cutters For Clay

www.cuttersforclay.couk



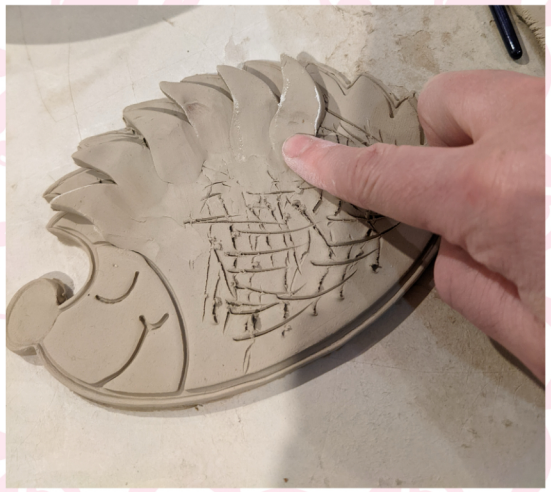
1. Roll your clay to 7mm thick then stamp and cut out your hedgehog shape

2. Roll some clay a little thinner to around 2-3mm thick and cut out lots of hedgehog spikes

3. Score all over the body of the hedgehog where you would like the spikes to go

4. Paint slip all over the area that you have scored on the hedgehogs body

5. Score the back of each spike and then start sticking them onto the body of your hedgehog



6. Smush the base of the spikes that are towards the back so that they are attached firmly

7. Layer your spikes as you wish to create your prickly friend. Form a ball of clay to the size you'd like the nose to be

8. Score the nose of your hedgehog and the underside of the ball of clay

9. Add slip to the areas you have scored

10. Firm the nose in place and seal around the edge of the ball with a damp paintbrush

11. Ta-dah...all finished!
